

29th January, 2021

Dear Parent/Guardian,

Requirements for Stage 5 Elective Food Technology

Your son/daughter has chosen to study Food Technology. This is a NESA course which forms part of their ROSA credential. To fulfil the requirements of this 200 hour course, your son/daughter is required to participate in both theoretical and practical activities.

Mandatory equipment required for theoretical lessons:

- Fully charged electronic device
- 48 page. lined exercise book
- A4 display folder (clearly labelled with name)
- Writing equipment

Mandatory equipment required for practical lessons:

- Fully closed-in, black leather (synthetic or genuine) lace-up shoes
- Tea towel
- White cooking apron (school white aprons are available at LOWES for approximately \$14.95).
- Container, approximately 1L capacity with leakproof lid

Students who do not have **ALL** of the above equipment on their scheduled practical lessons will not be allowed to participate and will be given alternate work. Failure to participate in practical lessons may jeopardise satisfactory completion of this course and will result in a letter being sent home.

We ask for your cooperation in supplying the above to ensure that your son/daughter is able to participate in the experiences planned for the year. Should there be any difficulty in supplying these materials, or in meeting the course fees, please do not hesitate to contact Ms Langley to discuss this matter.

Yours sincerely

B Hugo
Principal

A Langley
Rel. Head Teacher TAS Home Economics
